NOTICE OF JOB AVAILABILITY

TITLE: Industrial Engineer

DUTIES: Duties and responsibilities shall be: certification and qualification of suppliers in Colombia, Ecuador, Peru, and Central America, collaborate with suppliers in order to deliver the products in a timely and cost-effective manner, ensure correct execution of RBD vegetable oils delivery schedule and quality, effectively utilize industry, geographic, and infrastructure information to identify distribution channels and elaborate the most cost efficient logistic solution, create an innovative strategic logistics plan including the RBD vegetable oils' transportation and packaging development, identify new business opportunities through market analysis and contact with prospective clients, build and maintain relationships with clients to ensure customer satisfaction, travel to and visit clients' facilities to enhance their understanding of the needs and requirements, prepare presentation materials outlining our services and present to potential new customers, promote our valued logistics solutions to clients in the USA.

REQUIREMENTS: Bachelor's degree in industrial engineering plus eighteen months of experience as an industrial engineer with 18 months experience working with computer spreadsheets such as MS Excel. Bilingual English/Spanish required because the company's suppliers and clients are primarily from Latin America, particularly Colombia and most do not speak English. Correspondence, communications and most contracts are in Spanish. Overseas travel primarily to Latin America will take place about once every two months and applicant will fly from Miami or Fort Lauderdale airports.

SALARY/OVERTIME: \$75,000 per year

HOURS:

(Time Schedule/Days/Hours): 40 hours per week, 9am to 5pm weekdays
